Version 8

### SECTION 10.- STABILITY AND REACTIVITY

- Good stability at standard temperature.
- Avoid contact with oxidising agents.
- Avoid temperatures above or near the flash point.

### SECTION 11.- TOXICOLOGICAL INFORMATION

This preparation has not been subjected to toxicological testing as an entity but has been blended with materials with established toxicological bibliographies. In view of the difficulty of using current standard toxicological evaluation techniques to predict potential hazards to susceptible individuals or arising from unforeseeable potentiation, this preparation should be considered and handled as if it displayed health hazards and treated in consequence with all possible precaution.

### SECTION 12.- ECOLOGICAL INFORMATION

This preparation has not been subjected to ecotoxicological testing as an entity. In view of the difficulty of using current standard ecotoxicological evaluation techniques to predict the impact of particular modes of release on vulnerable or localised parts of the ecosystem, this preparation should be considered and handled as if it displayed potential environmental hazards, and treated in consequence with all possible precaution.

### SECTION 13.- DISPOSAL CONSIDERATIONS

Residual quantities of the product should be treated according to the instructions given under points 6, 7 and 8 above. Wastes should be eliminated according to national or regional regulatory requirements.

### SECTION 14.- TRANSPORT INFORMATION

In accordance with the European Agreement concerning the International Carriage of Dangerous Goods by Road (ADR), Regulations concerning the International Carriage of Dangerous Goods by Rail (RID):
